In the following passage some words have been missed. Fill in the blanks with the help of the alternatives given. Select the most appropriate option for each number.

A stone that remains immobile gathers moss, whereas one in perpetual motion does not. An individual who incessantly alters professional pursuits resembles such a stone. Attaining excellence demands steadfast(1)..... and dedication to a chosen path. This principle extends equally to academia. A true scholar must not exhibit(2)..... inclinations and must anchor themselves in a single domain. One who oscillates from mathematics to chemistry, veers into physics, and ultimately dabbles in engineering is doomed to remain(3)..... across all disciplines. Such volatility suggests a(4)..... character and an aversion to perseverance. The proverb encapsulates the essence of(5)..... and sustained focus.

Read the following passage carefully and answer the questions based on it.
Floods are a recurring calamity that afflict vast swathes of India, especially during the monsoon. When it rains incessantly, rivers, streams, and ponds are overwhelmed and unable to confine the deluge within their natural boundaries, triggering inundation. In certain regions, floods are worsened by the rapid melting of Himalayan snow, which escalates the volume of water flowing into rivers. Structural failures, such as breached embankments or outdated drainage systems, often exacerbate the situation. The ramifications of floods are devastating—human casualties, loss of livestock, destruction of crops, and widespread demolition of homes and infrastructure are routine. Entire communities are displaced, and public services like roads and railways are disrupted, isolating affected regions. Moreover, stagnant floodwater becomes a breeding ground for waterborne diseases. The resulting scarcity of essentials often leads to inflation, burdening the already suffering population. Bihar remains one of the worst-hit states, especially due to the Koshi River—fed by waters from Nepal—which has earned the moniker “the Sorrow of Bihar.” Combating floods requires an integrated approach involving immediate relief and long-term planning—ranging from robust embankment systems to watershed management and community awareness. Unless these measures are implemented urgently, the menace of floods will continue to endanger lives and livelihoods across India.
